

3dB Attenuation Performance for High Speed Interconnects Ultraflex Micro Coaxial Cable (UFX Coax)

The following specifications are for 50 ohm fluoropolymer coax constructions intended for use in micro coaxial cable assemblies. Other coax constructions are available including custom. For more information please contact High Speed Interconnects Application Engineering at 888-565-7878.

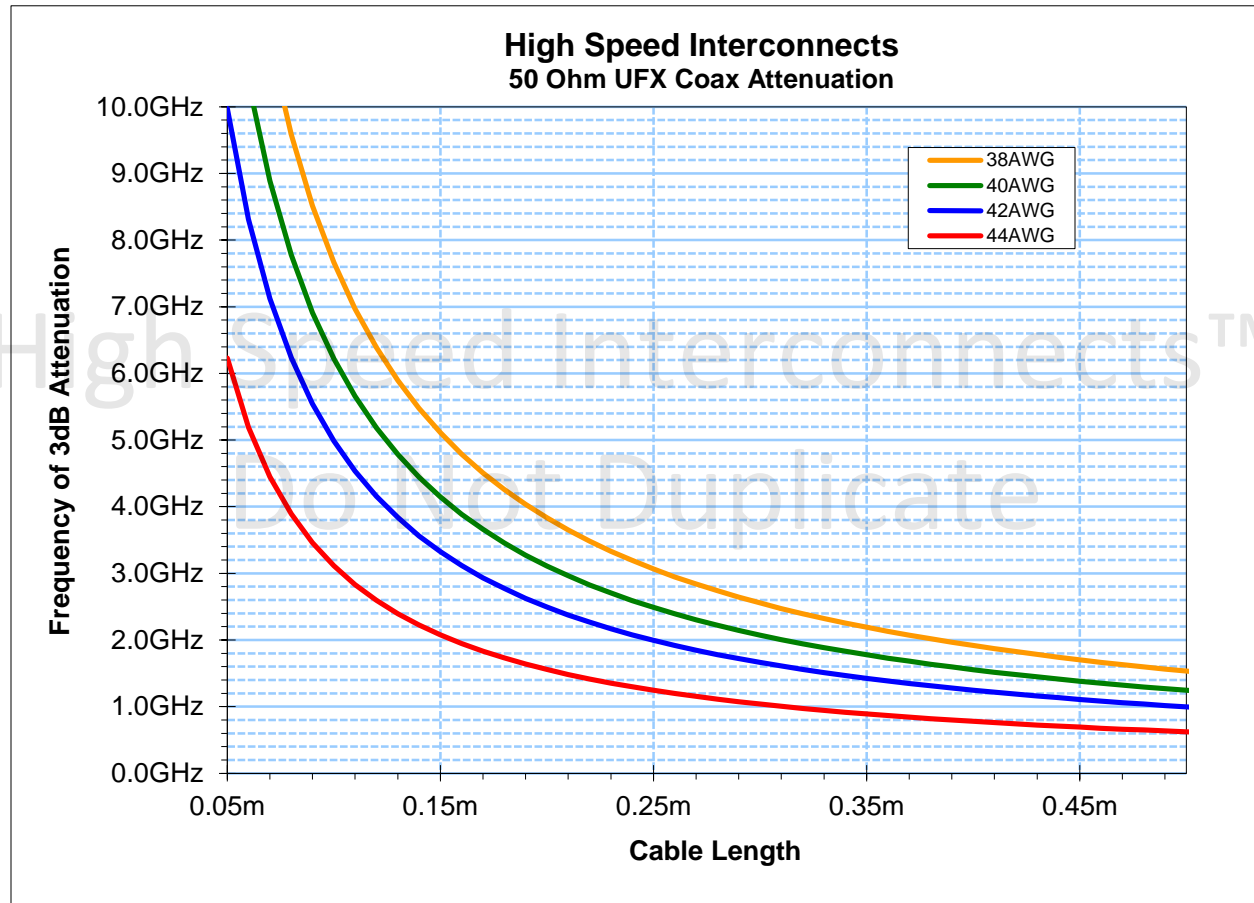

Chart shows frequency of 3 dB attenuation point as a function of cable length for each standard High Speed Interconnect UFX coax center conductor AWG size.
